This document has been updated and modified from the original Food Service guidance issued on May 18, 2020 to allow expanded access and functioning of restaurants and other food service industry establishments.

**Safeguarding Guidance:**

1) Review and follow the NH [Universal Guidelines](#).
2) Review and follow the CDC [guidance for cleaning and disinfection](#).
3) Provide [ServSafe COVID-19](#) training or its equivalent as soon as possible to all employees.
4) Business owners, managers, and all employees should familiar themselves with the [symptoms of COVID-19](#) and general [information about COVID-19](#).
5) Educate, inform, and instruct employees and customers about new policies and procedures related to hand hygiene, cloth face covering use, social distancing, cleaning and disinfection, illness policies, etc.
6) Build social distancing into food service operations to maintain a safe distance of at least 6 feet between employees and customers, and between other employees, when feasible. If 6 feet of distance cannot be maintained at all times in the food services operations, then face coverings shall be worn during work periods.
7) Direct customer contact/service employees shall wear cloth face coverings over their nose and mouth when at work, including when serving or greeting customers. They must also wear cloth face coverings when on breaks if social distancing of at least 6 feet cannot be maintained at all times.
   a. Cloth face masks/coverings should be worn and managed according to CDC guidance about [use of cloth face coverings](#).
   b. People wearing face coverings must not touch their eyes, nose, mouth, or face, or adjust their face mask without first sanitizing hands. After touching face or adjusting mask, hands must be sanitized.
8) Customers should be asked to bring and wear a cloth face covering to protect other patrons and employees. Cloth face coverings are not necessary while a customer is seated and dining outdoors.
9) Train all employees on the importance of frequent hand washing and the use of hand sanitizers with at least 60% alcohol content.
10) Conduct employee health screening as outlined in the Universal Guidelines for All New Hampshire Employers and Employees.
11) Prohibit employee(s) with COVID-19 symptoms or those who report a risk of exposure for COVID-19 from entering the work place:
   a. Person(s) with any COVID-19 symptoms, those who report close contact with someone suspected or confirmed with COVID-19, or those reporting travel risk factors outlined above should not be allowed into the facility:
      i. Symptomatic persons should be instructed to leave the premise immediately and contact their health care provider to be tested for COVID-19 and self-isolate at home.
      ii. Asymptomatic persons reporting close contact with someone
suspected or confirmed with COVID-19, or who report one of the traveled-related risk factors should [self-quarantine](https://example.com) for 10 days from their last exposure or return from travel.

iii. **NOTE:** Healthcare workers caring for COVID-19 patients while wearing appropriate personal protective equipment should answer “no” to this question

iv. **NOTE:** You do NOT need to quarantine for 10 days or get tested for COVID-19 if either of the following apply:

1. You are fully vaccinated against COVID-19 and more than 14 days have passed since you received the second dose of your COVID-19 vaccine.
2. You have previously tested positive for active COVID-19 infection (by PCR or antigen testing) in the last 90 days (if you had a previous infection that was more than 90 days ago, you must still follow all quarantine requirements)

12) Require all employees to report any symptoms of COVID-19, or close contact to a person with COVID-19 to a supervisor. Employees who are sick or not feeling well must stay home or, if at work already, must leave work immediately, isolate at home, and contact their healthcare provider for COVID-19 testing. Persons who do not have a primary care provider should seek out COVID-19 testing through one of the many local COVID-19 testing options. Person(s) with suspect or confirmed COVID-19 must stay home until symptom-based criteria are met for [discontinuation](https://example.com) of isolation:

   a. At least 10 days have passed since symptoms first appeared
      
      **AND**
   
   b. At least 1 day (24 hours) has passed since recovery (recovery is defined as resolution of fever off any fever reducing medications plus improvement in other symptoms)

**Consumer Protection:**

1) As an extension of the curbside and delivery model, permit outdoor dining. Restaurants are permitted to expand outside wherever an outdoor area can be set up safely, such as parking spaces close to entrances, sidewalks, existing patios, lawn areas. Outdoor areas must be able to be cleaned and disinfected, as appropriate. The outdoor space must be clearly delineated and distanced from people walking by. If expansion is in a shared space, coordinate and seek approval from local authorities.

2) Outdoor seating under tents can continue with the tent sides to be partially closed on the following conditions:

   a. Local officials who approved/permitted the outdoor seating areas must be consulted and must agree with the actions for partially closing the tents that each restaurant wants to take prior to the restaurant implementing those actions;
b. Cross-ventilation must be established through the tents;
c. Spacing of 6 feet between the tables must be maintained; and
d. Guests shall not stand/mingle inside the tent area.

3) Limit tables to no more than ten (10) individuals total.

4) Table spacing (both indoors and outdoors) should be maintained so people sitting at adjacent tables are more than 6 feet apart, and servers and waiters/waitresses should be able to maintain social distance while interacting with tables (e.g. taking orders). People moving between tables (e.g. customers going to the restroom) should also have adequate space to move between tables. The following exception can apply:
   a. Seating at bars, tables and back-to-back booths can be positioned closer than 6 feet between parties if protective, non-porous, rigid barriers separate the tables and booths (e.g., structural walls or Plexiglas/rigid plastic dividers) provided the following:
      i. Pliable materials (i.e., shower curtains or plastic sheeting) or porous materials (i.e., cloth dividers) shall not be used as barriers.
      ii. Any barrier used must be at a height that extends at least 6 feet from floor level and must be installed between tables and high traffic areas.
      iii. All barriers must allow for adequate airflow and air exchanges for each table. Each restaurant must consult with its HVAC contractors to ensure that any barriers that are installed do not cause issues with limiting air exchanges throughout the restaurant.
      iv. No barrier shall be installed within 18 inches of a sprinkler head.
      v. Restaurant owners must consult with their local health, fire, and building officials to ensure that any barriers constructed inside their restaurants are compliant with life safety code regulations.
      vi. All barriers must be cleaned in accordance with CDC cleaning and disinfecting guidance.
      vii. If a booth is equipped with a barrier, no table shall be placed directly at the end of the booth unless guests can be distanced at least 6 feet from the booth, or unless there is a barrier.

5) Reservations or call ahead seating is recommended to promote social distancing and prevent groups of guests waiting for tables. Only one member of the party is allowed to wait in the waiting area for their table to be ready and social distancing should be maintained.

6) Bar areas must follow social distancing protocols between groups or individuals seated at the bar unless protective, non-porous, rigid barriers (e.g., structural walls or Plexiglas/rigid plastic dividers) are used to separate seating areas at bars. Restaurant owners must consult with their local health, fire, and building officials to ensure that any barriers constructed or installed inside their restaurants are in compliance with life safety code regulations. Customers are not allowed to
stand/mingle in the bar area and must be seated (no groups interacting with each other). Games and other bar functions (e.g. pool/billiards, darts, arcade games, etc.) are allowed provided social distancing is adhered to at all times.

7) Disc jockeys and solo artists (including Karaoke) are allowed to perform inside a restaurant or function hall as long as they can maintain physical distance of 8 feet apart from audience members. Customers must remain seated throughout the performance unless entering, exiting or using restrooms. One performer is allowed on stage at a time. All participants/performers must use their own a microphone. Sharing of microphones is not allowed unless and until the microphone has been sanitized/cleaned per the CDC guidance for cleaning and disinfection or a protective cover is used by Karaoke provider and is removed and changed between use).

8) Small group bands (3 performers or fewer) are allowed as long as they can maintain physical distance of at least 10 feet from audience members.

9) Signage must be prominently posted throughout the venue to ask customers if they are experiencing COVID-19 symptoms, including:
   a. Fever
   b. Respiratory symptoms such as sore throat, runny nose, nasal congestion, cough, or shortness of breath
   c. General body symptoms such as muscle aches, chills, and severe fatigue
   d. Changes in a person’s sense of taste or smell
   e. If you answered yes to any of these questions, please do not put our employees and other guests at risk and come back another day when you feel better.

Business Process Adaptations:

1) Ordering food and alcohol orders to go are still allowed per Emergency Order 6 and Emergency Order 40 Restaurant Guidance.

2) Place hand sanitizer stations in restaurant lobby, reception, cashier stations, bathrooms, and other frequently used areas throughout the establishment.

3) Restrooms should be monitored and routinely cleaned and disinfected, and soap dispensers should be regularly filled.

4) Clean and disinfect all front-of-house surfaces including door handles, screens, phones, pens, keyboards and other areas of hand contact every two hours, at a minimum.

5) To the extent possible, use menus that are disposable or sanitized between each use. A disposable ordering system is also advisable when possible to limit guest interaction with wait staff.

6) Sanitize all tabletop items, including condiments, after each table turns (or use disposables).

7) Disinfect chairs, especially where contact occurs, after each table use.

8) Buffets are allowed; social distancing in serving lines must be maintained. Barriers (e.g. Plexiglas barriers, sneeze guards, etc.) are recommended to protect customers.
Employees serving and customers going through a buffet line must wear cloth face coverings while waiting in line, serving/beings served, walking to/from the buffet.

9) Evaluate building ventilation system to increase room and overall building ventilation, increase the number of air exchanges, increase outdoor air ventilation, limit internal air circulation, improve central air filtration, and routinely replace filters and perform other necessary maintenance.

10) Solely for contact tracing purposes, restaurants shall maintain a record of customers, including one customer name and contact phone number per party, the table number or bar seat number, the server or bartenders name, and the date and time they were in the establishment, for at least 21 days. To-go and window service areas are exempt from this requirement.

**Wedding, Catering & Function Hall:**

The following guidance applies to weddings and other function hall associated events. This guidance applies to events that bring individuals together for a planned event or celebration.

Group social gatherings, such as weddings, receptions and other celebrations, bring individuals from many communities together. In addition to guidance set forth in the universal, food service and places of worship guidance, the State of New Hampshire sets forth the following guidance to reduce exposure to COVID-19 to protect individuals attending and working at these events and the wider community.

**Considerations:**

When planning these events, please consider the following: crowd density, nature of contact between participants, number of participants coming from states or areas that are currently heavily impacted by COVID-19 within 10 days of the event, age or health of the participants, duration and mode of travel of participants, and that the length of the event may increase the risk of transmission.

For wedding ceremonies, organizers shall follow the Universal Guidance and should follow the Places of Worship Guidance.

For post-wedding celebrations and meals, organizers must follow the food service guidance as well as the following:

1) Outdoor events are preferable to indoor events to reduce the risk of exposure and spread to attendees. All organizers, staff, volunteers and attendees are strongly encouraged to follow physical distancing guidelines. This includes maintaining a distance of at least 6 feet between individuals and a distance of 6 feet between household groups. Outdoor venues may operate within any existing occupancy limits, as long as social distancing can be maintained.
2) Indoor events in venues may operate at 100 percent of their normal operating seating capacity that can be accommodated with social distancing between tables.
3) There should be a limit of 10 individuals at a single table.
4) Crowding should be minimized, and organizers should consider using distancing measures to reduce close contact among people during the gathering. This includes staggering of arrivals and departures and minimizing congregation at sanitary stations, rest rooms, and water/drink distribution areas.
5) Dancing within 6 feet of another individual is discouraged, with the exception of family members and individuals from the same household.
6) Face coverings should be worn when social distancing is not possible between household groups.
7) Consider displaying posters and signs around the venue to remind attendees and staff to take steps to prevent the spread of COVID-19.
8) Other applicable provisions of the Food Service Guidance must be followed.
